

Tikal's open .NET services... its all the edge you need

In today's competitive and stressful business environment, many application developers are struggling to keep up with the growing demand for faster, simpler and more secure delivery of applications from design phase to production. Using same approach and development tools as before, clearly will not bring you to your finish line on time and on budget.

Tikal, the leading provider of Open Source ALM (Application Life cycle

Management) solutions and services gives you the edge you need in order to achieve your goals and development objectives.

For the first time, .Net developers can use open source add-on modules which enable them to **shorten development cycle and reduce its cost by:**

- Using existing code
- Simplifying development complexity
- Easy integration of open source modules to the commercial platform.
- .Net open source, the Edge you need

We offer you the tools and methodology that will enable you to embed Open Source software modules to your native .Net environment such as **S#arp Architecture, NHibernate, MongoDB, NUnit and more.**

We offer the following services by our .NET experts:

- Tailored Advisory and Consultancy Services
- Customer On-site Open Source .net 'master' bootcamp:
 - NHibernate tutorial, covering assimilation of the ORM framework to your product.
 - S#arp Architecture hands on training by Tikal's leading .NET expert.
 - Assessment of your application development needs & where open source tools can fit in
